

Magento Store Health Checklist

(Quick 7-Point Self-Audit for Store Owners & Developers)

Magento Version

- Are you running the latest stable Magento 2.x release?
- Staying updated = better security, speed, and features.

Security Patches

- All official Adobe/Magento security patches been applied?
- Outdated patches = open doors for hackers.

Site Speed

- Does store load in under 8 seconds?
- 70% of ecommerce traffic now comes from mobile checkout?

Checkout Flow

- Are there any friction points & optimally optimized for mobile payment gateways?
- Fewer steps – higher conversion.

Extensions & Integrations

- All extensions up to date & compatible with your version?
- Remove unused or conflicting modules.

Backup & Monitoring

- All extensions up to date & compatible with your version?
- Monitor logs, uptime and error reports

- **Pro Tip**, if you'd like a detailed audit of your Magento store, feel free to reach out—I've helped many ecommerce brands catch hidden issues before they became costly.
